IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

My dear Sir

The sheet is correct – for April/03 & for Oct 13th.

I know I differ in April from my neighbours but showers are partial, & I was at home all that month & kept the record myself & there was no mistake.

Yrs faithfully
A. C. Hervey

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

Kept at Colmer Rectory

in the County of Hants 5

by Rev a. c. Hervey

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 1 in.
" " " Sea Level 560 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name TISTED
Distance 1m Direction N Westly

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

10 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Ampfield Vicarage

in the County of Southampton

by Revd. Vere Awdry

Wt gap

RAIN GAUGE
Pattern Howard
Diameter of top 5 in.
Height of top above Ground ~~222~~ 3 ft. 0 in.
" " " Sea Level 233 ft.

Time of Observation 9 am

Nearest Railway Station
Name Chandlers Ford
Distance 3½ Direction S N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

14 FEB 1911

Kept at Basingstoke Water Works

in the County of Southampton 8

by F.R. Phipps. A.M. Inst. C.E., Boro. Engineer

RAIN GAUGE
Pattern Stanleys
Diameter of top 5" in.
Height of top above Ground — ft. 6
" " " Sea Level 320 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Basingstoke
Distance 1300 Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RE 1909.

FORM A2.
BRITISH RAINFALL.
-3 JAN 1910

Kept at Bodorgan House Bournemouth

in the County of Hants

by Judge Philbrick K.C.

Rain Gauge: Pattern Howards
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 151 ft.

Time of Observation 2 p. on Sundays only.

Nearest Railway Station: Name Bournemouth
Distance 1, Direction NE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

2 JAN 1911

Kept at Beechcroft, Curdridge

in the County of Southampton 5

by Miss L. M. S. Pasley

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 96 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Botley
Distance 200 yds Direction S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Ditcham Park

in the County of Hampshire 5

by Charles J. P. Cave.

Rain Gauge:
Pattern Snowdon
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 555 ft.

Time of Observation 9 a.m.

Nearest Railway Station: Name Petersfield. Distance 3·6 Direction N 6° W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at Fir Hill, Droxford

in the County of Hants 5

by Capt Mackenzie-Grieve R.N.

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 3 ft. 6 in.
" " " Sea Level 212·3 ft.

Time of Observation 9 AM.

Nearest Railway Station
Name Droxford
Distance ± (abt) 2m Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
4 JAN 1911

Kept at Uplands, Droxford
in the County of Hants 5
by Miss A. M. Bridge

Rain Gauge
Pattern British Association
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 279 ft.
Time of Observation 9 A.M.
Nearest Railway Station Name Droxford.
Distance 3/4 mile Direction E.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Fratton
Distance Direction W.S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REG 10

FORM A2. BRITISH RAINFALL. 3 JAN 1911

tons copper with funnel tube

Kept at Faccombe Manor

in the County of Hampshire 4

by Herbert Gibson

Rain Gauge: Diameter of top 8 in.

Height of top above Ground 1 ft. 3 in.

" " " Sea Level 760 ft.

Time of Observation 9am.

Nearest Railway Station: Name Woodhay

Distance 5m Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground — ft. 7 in.
„ „ „ Sea Level 150 ft. (about)

Time of Observation 9 o'clock A.M.

Nearest Railway Station
Name Fordingbridge
Distance 4 miles Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
27 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Highfield Park

in the County of Hampshire

by F. B. Marson

Rain Gauge: Pattern .... Diameter of top .... in. Height of top above Ground .... ft. .... in. „ „ „ Sea Level .... ft.

Time of Observation ....

Nearest Railway Station: Name Mortimer Distance 5 miles Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Herriard Vicarage

in the County of Hampshire

by Rev. E. L. Crawhall

RAIN GAUGE
Pattern Snowdon + Camden [illegible]
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 557 ft.

Time of Observation ~~557~~ 9.0-a.m.

Nearest Railway Station
Name Herriard
Distance 300 yds. Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

16 JAN 1911

Kept at The Mill House, Hurn

in the County of Southampton 2

by, Geo Rea, for the Earl of Malmesbury

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 1 in.
" " " Sea Level ft. not certain

Time of Observation 9 am

Nearest Railway Station
Name Hurn L & S W.
Distance 3/4 mile Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
